

**CASE REPORT****ANAPHYLAXIS FOLLOWING  
INTRAVENOUS VITAMIN K IN AN  
INFANT**

**Abstract:** *Anaphylaxis following intravenous vitamin K in infants is reported rarely in literatures. A 7 month old infant, a childhood wheezer with intrahepatic cholestasis, previously on oral vitamin K supplements developed serious anaphylaxis following administration of intravenous vitamin K during hospital stay. He was resuscitated with appropriate measures. Fatal adverse events following intravenous vitamin K although rare should be anticipated.*

**Keywords:** *Vitamin K, Anaphylaxis, Epinephrine, Children*
