

CASE REPORT**A RARE COMPLICATION OF DISTAL RENAL TUBULAR ACIDOSIS***** Yasmeen MS****** Avinash Vattam******* Mehul A Shah**

Abstract: *We report a 9 year old girl with distal renal tubular acidosis presenting with acute hypokalemia following withdrawal of potassium citrate supplementation. During the course of severe hypokalemia, she developed acute rhabdomyolysis and hyperkalemia, a rare complication. To the best of our knowledge, this is the first report of hypokalemic rhabdomyolysis in a child with distal renal tubular acidosis from India.*

Keywords: *Distal renal tubular acidosis, Hypokalemia, Rhabdomyolysis, Creatine kinase.*
